ARRAYS

1)Write a program that finds the number of elements in an array without using built-in features.

```
using System;

class Program

{

   static void Main()

   {

      Console.Write("Enter the number of elements: ");

      int n = Convert.ToInt32(Console.ReadLine());

      int[] arr = new int[n];

      Console.WriteLine("Enter the elements:");

      for (int i = 0; i < n; i++)

      {

         arr[i] = Convert.ToInt32(Console.ReadLine());

      }

      int count = 0;

      foreach (int item in arr)

      {

         count++;

      }

      Console.WriteLine("Number of elements in the array = " + count);

      Console.ReadKey();

   }

}
```

OUTPUT

Enter the number of elements: 7

Enter the elements:

12

25

18

40

55

60

75

Number of elements in the array = 7

2) Write a program to accept 10 integers into an array and perform the following actions:

```
using System;
class Program
{
   static void Main()
   {
      int[] arr = new int[10];
      int sum = 0;
      Console.WriteLine("Enter 10 integers:");
      for (int i = 0; i < 10; i++)
      {
         arr[i] = Convert.ToInt32(Console.ReadLine());
         sum += arr[i];
      }
      for (int i = 0; i < 10; i++)
      {
```

```
            for (int j = i + 1; j < 10; j++)
            {
                if (arr[i] < arr[j])
                {
                    int temp = arr[i];
                    arr[i] = arr[j];
                    arr[j] = temp;
                }
            }
        }
        Console.WriteLine("\nElements in Descending Order:");
        for (int i = 0; i < 10; i++)
        {
            Console.Write(arr[i] + " ");
        }
        int max = arr[0];
        int min = arr[9];
        Console.WriteLine("\n\nMaximum Value = " + max);
        Console.WriteLine("Minimum Value = " + min);
        Console.WriteLine("Sum = " + sum);
        Console.ReadKey();
    }
}
```

OUTPUT

Enter 10 integers:

100

25

60

15

80

5

45

30

70

10

Elements in Descending Order:

100 80 70 60 45 30 25 15 10 5

Maximum Value = 100

Minimum Value = 5

Sum = 440
